Protect-A-Shield

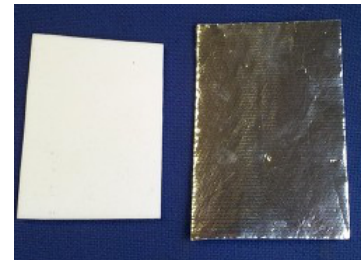

Manufacturers & Suppliers of Passive Fire Protection Products

Construction :-

Protect-A-Shield is a fibrous ceramic paper coated with a low-toxic polymeric type adhesive system. An aluminium reflective foil is bonded to the exposed surface. The inner surface has a release paper that can be removed to reveal a pressure sensitive adhesive system that can be used to locate the shield to a horizontal, vertical or curved surface.

Protect-A-Shield offers the following benefits :-

- High temperature stability up to 1000°C
- Simple to wrap, shape or cut
- Speed and ease of installation
- Continued flexibility of adhesive system and paper without ageing.

Protect-A-Shield is available in :-

Sheet sizes :- up to 600mm wide and in 1 metre lengths.

Thickness :- 2mm - 6mm

The Company reserve the right to update this data sheet should any additional information become available. As our products are being used for a variety of applications under different conditions, the Company will not be held responsible for the failure of any product. Whilst all information is provided in good faith, it is up to the customer to test and establish suitability of each product via their own test methods.
