Setting Blocks

Manufacturers & Suppliers of Passive Fire Protection Products

Product Description

Setting Blocks are a solid impregnated glazing block based on inorganic oxides. They don't contain any artificial mineral fibres.

Classification E according to DIN EN 13501-1

Application

For setting fire rated glass into a fire rated frame.

Technical Data

Composition construction material based on inorganic oxides

Material Structure Hard material

Raw density (kg/m³) 875 -1020

Temperature resistance (°C) 1100

Impregnation (g/m²) 40 -80

Availability

Standard length 80mm

Standard widths 8mm – 40mm

Standard thickness 3, 4 and 5mm

Special sizes available on request

The Company reserves the right to update this data sheet should any additional information become available. As our products are being used for a variety of applications under different conditions, the Company will not be held responsible for the failure of any product. Whilst all information is provided in good faith, it is up to the customer to test and establish suitability of each product via their own test methods.
