007 Adhesive

Manufacturers & Suppliers of Passive Fire Protection Products

007 Adhesive is a water based glue capable of withstanding 1000 °C in its dry form. As it is a water based glue it has a low fume emission and is user friendly yet only takes 20 minutes to initially cure in ambient temperatures. Sticky only when wet the adhesive dries to form a hard but slightly flexible bond.

007 Adhesive offers the following benefits:-

- Can be applied to either substrate which requires bonding
- Environmentally friendly
- Only a clean, dry surface is required, no need for pre-treating
- One pack system
- High temperature stability up to 1000 °C
- Solvent free
- Can be applied by either brush or spray coating
- Slow drying time gives fitters ample time to relocate items to be bonded

Applications.

- High temperature adhesive for ceramic fibre blanket, paper, board etc.
- Ideal for use in high temperature laminations
- Ideal for bonding most high temperature substrates including intumescent

The Company reserve the right to update this data sheet should any additional information become available. As our products are being used for a variety of applications under different conditions, the Company will not be held responsible for the failure of any product. Whilst all information is provided in good faith, it is up to the customer to test and establish suitability of each product via their own test methods.
